

High performance milling cutter for composites. Made in France.

- Excellent surface finish
- Effective Chips removal
- High speed machining
- Made in France
- Compression toothing

#### Machine

#### Application

O3-  
PLASTICS

#### Features

#### Properties and benefits

- + Compression toothing : Double helix for compression machining of sandwich and composite materials. ➡ The "compression" toothing applies reverse forces throughout the machining process to hold the material fibres to prevent them from splitting or tearing.
