

# 8243951 | DAGGER solid carbide drill TivolyNorm -Z4 -Straight dagger reamer

Drill for carbon and carbon/aluminium (3xØ). Thicknesses < 5mm. Straight dagger type.

- **Made in France**
- **Allows the enlargement of existing holes**
- **High precision drilling and reaming**
- **Special low thickness**
  
- **Monobloc carbide**
- **Avoiding delamination**

### Machine

### Application

N1-  
Aluminum  
alloy

O3-  
PLASTICS

### Features

### Properties and benefits

- + Monobloc carbide (Milling) : Tungsten carbide. ➡ Micrograin carbide for stable cutting edges and better wear resistance.
- + Avoiding delamination : Anti-delamination sharpening. ➡ Cutting geometry to avoid fibre breakage when machining composite materials (CFRP, GFRD, Carbide, Glass fiber, Kevlar...)
